MYROSLAVA **SKALA**

JUNIOR FRONT END DEVELOPER

I am a beginner Front End Developer - who permanently improve and increase programming skills. What fascinates me in programming is the ability to create something fruitful out of just a simple text editor and a compiler.
I've successfully finished the course JavaScript: React at school Coders Lab and got a certificate. Currently, I'm improving my skills in JavaScript and React, and also I'm learning TypeScript. I have a great enthusiasm for work, passion and the ability to learn quickly.

PROJECTS

ClassicalApp
https://ms-classical-app.herokuapp.com
Web application created for classical music lovers.
This application helps to find the composers and their works.
Technologies:
